BRING INTERACTIVITY IN YOUR CONFERENCE ROOM

EASY COMM

EasyCOMM is the perfect tool for generating interest and awareness of your event online by creating a hub for all online communications relating to your event.

- **IMPROVES ATTENDEE INTERACTIVITY**
- **PERSONALISED, BRANDED INTERFACE**
- **INCLUDES MODERATION TOOLS**
- **IMPROVES ONLINE VISIBILITY**

EasyCOMM encourages your attendees to send comments and feedback through tweets, email, SMS and online messages during the event. These messages are then displayed on a fully customised screen either in real-time or after moderation.

A comprehensive moderation system ensures that irrelevant or offensive messages will not be displayed on the screen. With EasyCOMM you can create lists of permitted users and topics in advance of your event, or onsite with a smartphone/laptop.

OneTec can brand your easyCOMM wall with the logo of your event or sponsors. The whole interface can be customised.

To get the conversation started at your event – choose easyCOMM!
